EXPERIENCE

10/2023 - Present

Remote

Open Source Contribution

Back Pack

Back Pack is web3 crypto wallet its code base is open Source.

- I made a contribution that touched the frontend(**react**) backend(**Express**) and database(**postgres**).
- so backpack is the extension not a website I have made the changes to the extension ui and Added the firstname and lastname fields to the onboarding form.
- connected this filed to the backen and made the changes In the data base sp it can accept the lastname and firstname In the user tabel.
- It uses the **Hasura** layer on top of the **postgres** database which provide the **GraphQL** layer on the top of the data base and backend talk to the database through **graphql** layer.

06/2022 - 08/2022

Jaipur

Full Stack Developer

Crony Technovest OPC Private Limited

Crony Technovest provide the solutions ranging from consultation, product development and technical support.

- Developed a secure platform connecting cybersecurity professionals and clients, ensuring complete anonymity of data.
- Prepared a comprehensive manual document detailing the project's details and flow, and effectively divided the project into modules and sub-modules for streamlined development.
- Used the **Node.js** and **postgres** for the backend Tech stack and **React** for the Frontend Tech
- Collaborated with cross-functional teams to gather requirements, understand user needs, and incorporate feedback into the development process.
